

The remarkable RAM Compact

Our designer's dream come true – the RAM Compact is the result of constant work in our new anechoic chamber to make a really inexpensive speaker that we can still justifiably call RAM.

Using a cabinet similar to the Mini Bookshelf and two rigorously tested units, the Compact can be driven really hard and yet is efficient enough to work perfectly with amplifiers of only ten watts.

Subjectively, it is remarkable for its excellent transient performance, extended bass response and overall smoothness of sound.

We believe that the standard set will establish it as the reference speaker for its size and price.

Specifications:

Drive units:

1 × 165mm LF/MR unit

1 × 26mm polyamide dome HF unit

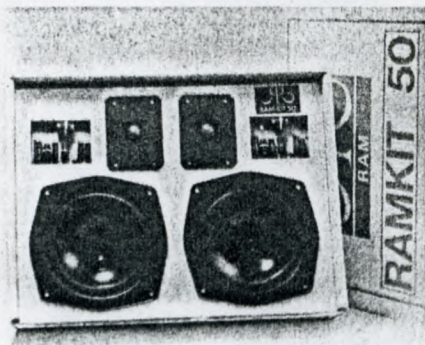

Dimensions: 9 in. (w) × 13 in. (h) × 7½ in. (d).

System loading: Acoustic suspension

Amplifier matching: 8 – 35 watts

Nominal impedance: 4 – 8 ohms

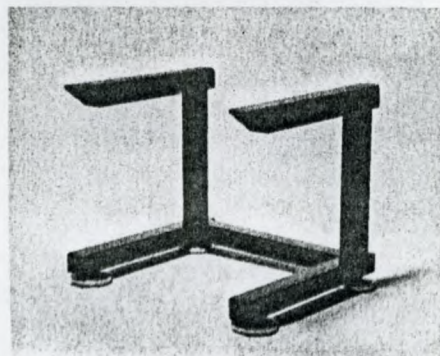

RAM Kit 50

A RAM 100 at half price – that's what our Kit 50 offers you.

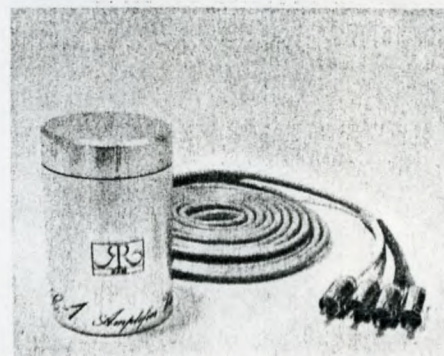

Complete with detailed instructions and diagrams, just build the boxes, fit in the drive units and you'll have the sound of one of the best selling speakers on the English market. And that's important because most other kits build into speakers not otherwise available – that you can't listen to first.

RAM Stand

All our larger speakers can be used on stands to advantage. Now available are matching stands in brown. They are fitted with adjustable feet that can be used to give the stand front a 5° lift. The feet are nylon covered for easy positioning. So put RAM speakers where they belong – on RAM stands!

RAM Remote

Now you can adjust the volume of your hi-fi without getting up – with the RAM remote amplifier volume control.

Ever wanted to turn up your favourite track or turn down the bit that really annoys you? Well, it's often too much bother to get up and walk across the room. So just plug in the remote control and you can relax for good.

It comes in very useful next to the telephone too. And it won't affect the quality of your sound because all the components are of the highest quality.

You can get a lot of pleasure from this inexpensive addition to any hi-fi. So treat yourself to a small present – now!
